**Digital Bros**  
digital entertainment

After signing on with Keepit to back up all of their Microsoft Office data in 2021, the Digital Bros continued business as usual until they were searching for some files. They realized that some critical data had accidentally been deleted during a mailbox migration. Luckily, for Keepit customers, deleted data is never lost. IT Manager Giovanni Pisati recalls finding the deleted emails immediately in Keepit's backup set.

*After realizing that some critical emails had been deleted, I was instantly able to recover and restore the emails in Keepit's backup set, meaning all the deleted files were completely safe in Keepit's twice-daily backup procedure.*
