

PARK 'N FLY

Park 'N Fly chooses Keepit for its unparalleled ease of use

In search of a secure cloud backup solution, Park 'N Fly chose Keepit as their Microsoft 365 backup and recovery solution. An easy-to-use solution, Keepit saves time and gives the IT team at Park 'N Fly peace of mind.

No More Micromanaging Multiple Backup Applications

Prior to using Keepit, Senior Director of IT Ken Schirmacher shares that his daily tasks involved micromanaging multiple backup solutions – a timedrain that stole energy from his day-to-day workload. Keepit's easy-to-use solution provides the comprehensive backup that Park 'N Fly needs, giving Ken's IT team the opportunity to focus on other tasks.

“Our everyday is busy enough with keeping everything up and running. Keepit’s solution does its job in the background so that we can focus on other tasks.”

Ken Schirmacher

Sr. Director of IT/Interim CIO, Park 'N Fly

Microsoft Backup “Not Enough”

Aware of Microsoft's own recommendation to use a third-party backup, Park 'N Fly decided that relying on Microsoft for backup wasn't enough. After all, in the event of data loss, Microsoft may not be able to deliver a data restore. Park 'N Fly chose Keepit as their backup solution to ensure that their data was being backed up twice daily, giving them peace of mind knowing that their data was safe in the event of data loss or data deletion.

“I can’t speak more highly about the fact that I can have Keepit running in the back end, and I know it’s backing everything up.”

Ken Schirmacher

Sr. Director of IT/Interim CIO, Park 'N Fly

“I like to call Keepit a Steady Eddie. I know it’s working; I know it’s running, and I don’t have to sweat it.”

Ken Schirmacher

Sr. Director of IT/Interim CIO, Park 'N Fly

“If you don’t have third-party backup and Microsoft cannot restore your data, you’re just out of luck. We went with Keepit to ensure both consistent backup and long-term retention of our data.”

Ken Schirmmacher
Sr. Director of IT/Interim CIO, Park 'N Fly

Unparalleled Ease of Use

When Park 'N Fly first started using Keepit, they were amazed at how easy it was to setup and use the platform. For the first time in a while, Senior Director of IT Ken Schirmmacher explains that he didn't have to have “four or five different versions of the software running” to secure the backup.

“Our previous backup solutions created micromanagement-style tasks that we don’t have time for. With Keepit, we receive all our backup needs in one place.”

Ken Schirmmacher
Sr. Director of IT/Interim CIO, Park 'N Fly

PARK 'N FLY

About Park 'N Fly

Park 'N Fly is the leader in affordable offsite airport parking, providing an easy way to save time when parking at the airport.
