

# Backup and Recovery for Google Workspace

Google Workspace does not include automatic backup and only offers minimal data protection against data deletions, overwrites, and ransomware. As a Google Workspace customer, you are responsible for ensuring the necessary protection of your data (not Google).

## Truly protect your data and gain automatic restore capabilities with Keepit

Keep as much data as needed, for as long as you'd like, and don't ever worry about losing data in Google Workspace's trash bin after you pass the 30-day data retention limit.

Keepit is the world's only independent cloud dedicated to SaaS data protection. It gives you:

### Speed

Easily browse or search across your Google Workspace apps and recover data in seconds - even if a full disaster recovery is needed. You can restore anything - whether it's a single e-mail, a single user, or a complete user account.

### Simplicity

Enjoy the benefit of a set-and-forget installation that requires no training. And when it's time to grow, stay in control with enterprise scalability without any surprises. Pay one flat fee per user (includes unlimited data storage & retention.) No hidden costs.

### Security

The moment you backup your data with Keepit, it is immediately rendered immutable to ransomware - and therefore impossible to delete. Our blockchain-verified storage and file system ensures unparalleled security protection.

## Automatic backup and unlimited storage for your Google Workspace data

We offer a simple, yet powerful, backup and recovery solution to protect your Google Workspace data from internal errors, malicious actions, ransomware or other cybercrime. The coverage includes:

Gmail

Personal Google Drive

Team Drive

Documents, Sheets & Slides

Calendar

Tasks

Sites

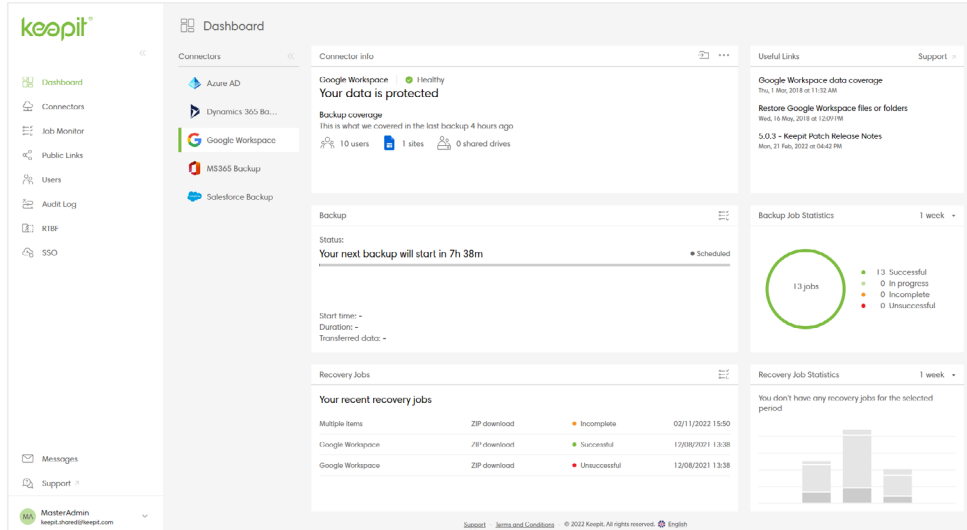

Forms

A 100% cloud-based solution for secure and easy backup, search, and restore

Unlimited storage — Customized retention — Automatic discovery of new users — Free data archiving for inactive users — Easy granular and point-in-time restore — Role-based access management — Compliant with regulatory demands

“Very easy to use and reliable. Was quick to implement.”

CIO, Oil & Energy Industry, Capterra Reviews

“We have saved significant IT efforts and a significant amount of money after setting up Keepit backup connectors.”

Senior Global IT Infrastructure Specialist, Packaging & Containers Industry, TrustRadius Reviews
