

Protect Your Google Workspace

Can You Afford to Lose Your Data? — Google Workspace does not include automatic backup and only offers minimal data protection against data deletions, overwrites, and ransomware. As a Google Workspace customer, you are responsible for ensuring the necessary protection of your data (not Google). Protect your data with the world's only independent cloud dedicated to SaaS data protection.

Recover in minutes

Easily browse or search across your Google Workspace apps and recover data in seconds — even if a full disaster recovery is needed. You can restore anything — whether it's an e-mail, a single user, or a complete user account.

Secure your data

The moment you backup your data with Keepit, it is immediately rendered immutable to ransomware — and therefore impossible to delete. Our blockchain-verified storage and file system ensures unparalleled security protection.

Get started easily

Enjoy the benefit of a set-and-forget installation that requires no training. Pay one flat fee per seat with no hidden costs, including unlimited data storage. And when it's time to grow, easily scale to your needs.

Automatic backup and unlimited storage for your Google Workspace data

We offer a simple, yet powerful, backup and recovery solution to protect your Google Workspace data from internal errors, ransomware or other cybercrime. The coverage includes:

Gmail

Personal Google Drive

Shared Drive

Documents, Sheets & Slides

Calendar

Tasks

Sites

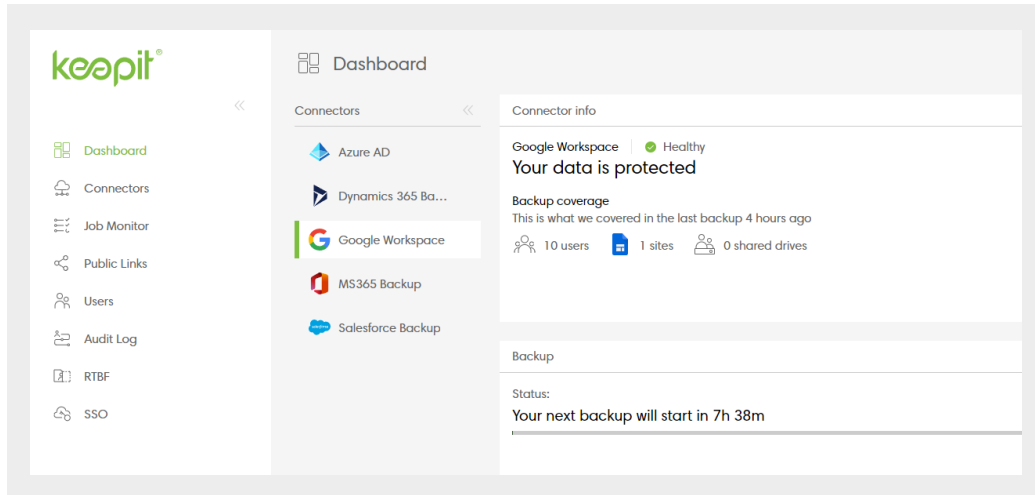

Forms

A 100% cloud-based solution for secure and easy backup, search, and restore

Unlimited storage — Customized retention — Automatic discovery of new users — Free data archiving for inactive users — Easy granular and point-in-time restore — Role-based access management — Compliant with regulatory demands

“We have saved significant IT efforts and a significant amount of money after setting up Keepit backup connectors.”
