

Backup and Recovery for Salesforce

Can You Afford to Lose Salesforce Data? — Secure your Salesforce data with automated daily backups, unlimited storage, and instant restore. According to industry analysts, Salesforce data backup Recovery Time Objective (RTO) takes six to eight weeks and costs \$10,000 per restore, per organization. Can your business risk paying this cost while also missing mission-critical data for weeks?

Restore in Minutes

Protect your Salesforce production data from accidental deletion, human error, and data corruption with full restore of Salesforce data across production and sandbox environments. With Keepit you can quickly restore granular, related, and multiple records from any point in time.

Secure your Data

Automated daily backups in Keepit's proprietary cloud are immutable to ransomware — and therefore impossible to delete. Our blockchain verified storage and file system ensures unparalleled security protection.

Simplicity to Save Time

Easily setup sandbox instances and restore your Salesforce data with an intuitive user interface which requires no additional training. Choose an intuitive user interface with high-speed search, file preview, and user-friendly restore options.

Designed to Protect Your Salesforce Data

Keepit for Salesforce gives you comprehensive and easy to use backup. More importantly, get peace of mind that your Salesforce data is protected with Keepit's proprietary cloud.
