Backup and Recovery for Zendesk

Can you afford to lose Zendesk data? — Zendesk backs up your data for large-scale disaster recovery but does not provide granular data restores, cannot protect against accidental deletion or changes to your automation, and does not help recover from damage caused by corrupted imports. Protect your data and keep your organization running seamlessly with Keepit for Zendesk.

Protect Automation
Protect your critical triggers, automation, macros, and views from accidental deletion or breaking changes with automated daily backup that protects your automation and makes recovery simple.

Restore Data in Minutes
Get your Zendesk data back instantly with smart search, file preview, and granular restore. Save training time for your team with our easy-to-use and easy-to-restore tool.

Secure Your Data Backup
Keepit's worldwide network of data centers protects your Zendesk data with four copies in two locations per region—all immutable thanks to our industry-leading blockchain-based system.

Built to protect your Zendesk data
Keepit for Zendesk gives you a comprehensive and easy-to-use backup. Get peace of mind that your mission critical Zendesk data is protected from accidental deletions, malicious actions, and cyber-attacks.

A 100% cloud-based solution for secure and easy backup, search, and restore
Automated daily backup — Unlimited storage — Granular restore — Automations backup — No-cost data archiving for inactive Zendesk users — Point-in-time restore — Role-based access management — Audit Logs

Why companies globally trust us
Customers around the world have made Keepit their preferred choice for protection against data loss and downtime. Here's why they trust Keepit to keep their Zendesk data safe:

Data Availability
Exclusively dedicated to securing SaaS data, Keepit's proprietary cloud is designed to ensure data availability — always.

Cost Effectiveness
With Keepit, everything is included in the seat price, keeping things simple. Scale your data protection at no extra cost.

Outstanding Simplicity
A universal service that covers all your SaaS data protection needs. Loved by admins for its ease of use. Simplicity that will save you time.

Instant Recovery
Restore your data in seconds with our unique search and restore features, based on ultra-fast indexing and reindexing algorithms.

Leading Security
Described by analysts as industry-leading, our platform is purpose-built from the ground up for ultimate security.

About Keepit — The market leader in cloud backup and recovery, Keepit is headquartered in Copenhagen, Denmark, with offices and data centers in the US and globally.
