

Keepit Backup and Recovery for Autodesk Forma

Continuous access to your Forma data when Autodesk goes down

Autodesk Forma (formerly Construction Cloud) holds a project's single source of truth — drawings, issues, transmittals, RFIs, and cost data — entirely within its environment. Platform outages, accidental bulk changes to users or roles, and account compromise can cut off access, and Forma has no native rollback. Without an independent backup, teams have no fallback when access breaks down.

Awarded for its broad SaaS coverage, secure by design architecture, and ease-of-use, Keepit ensures that your Autodesk Forma data is backed up and swiftly recoverable at all times, minimizing the impact of data loss and the burden of recovery on your teams.

Time-saving usability

Easy to implement and intuitive, Keepit requires minimal expertise to use — while delivering confidence in your ability to swiftly recover your data whenever you need it.

Assured data integrity

With Keepit, you're certain that your backups are immutable — they can't be modified or deleted. Stored in our vendor-independent cloud, your data remains accessible at all times.

Confidence that you can recover

With our automated backups and hot storage, you have all your data, configurations, and relationships always at your fingertips — no matter what incident is stalling your projects.

The risk

Construction was the No. 1 ransomware target within manufacturing in Q3 2025, accounting for 142 of 532 incidents — 27% of all manufacturing attacks.

Proven benefit

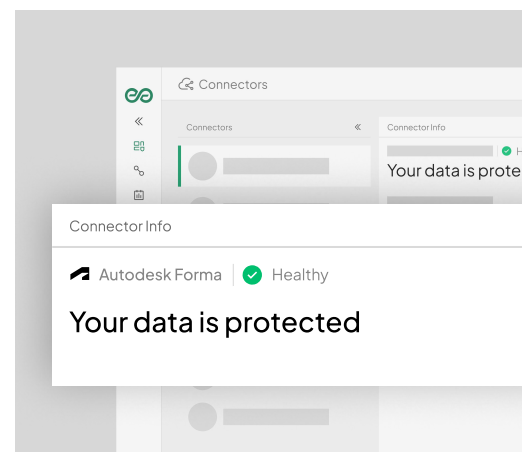

Keepit customers were able to reduce the time needed to restore data for priority users by 90% after a data loss incident.

“Forma is critical to our organization. Autodesk has little direct support and implementation options for backing up data and therefore this will be absolutely beneficial and solve a real gap in our Information Security posture.”

April Battenfelder, Managing Director at BEAST Design Studios GmbH, Germany

KEY CAPABILITIES

Automated backups

Customize and automate backup jobs so your data remains preserved and recoverable whenever you need it.

Compliance and reporting

Easily document and prove compliance with backup requirements and data protection efforts.

Outstanding ease-of-use

Built to protect SaaS applications, Keepit is quick to implement and intuitive to use.

Instant search and preview

Easily find what you need with Keepit's comprehensive search. Use filters to identify data, and the preview function to review it before restoring.

Unlimited retention

Customize retention for up to 99 years with no extra costs

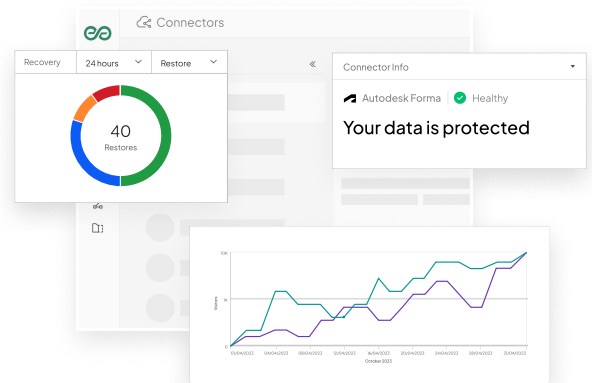

Highest security

Stored in our vendor-independent cloud, and immutable by design, Keepit offers industry-leading security, keeping your backups safe.

WHAT WE COVER

Modules: Build and Data Management

Users	Projects
User definitions	Definitions
User Projects	Sheets
Project memberships	Sheet collections
Roles	Sheet versions
Products	Files and folders
Companies	Packages
Definitions	Issues
User mappings	Issue comments
Projects mappings	Issue attachments
	Issue settings
	Templates
	Transmittals

 We continuously extend our capabilities. Find the complete, current coverage [here](#).
