

Keepit Backup and Recovery for DocuSign

Never lose a signed deal—keep contracts safe and recoverable at all times

Contracts and agreements are fundamental to business operations, legal compliance, and financial transactions. DocuSign offers limited retention and recovery capabilities. Losing or corrupting this data can lead to legal liabilities, financial losses, and operational disruptions.

Awarded for its ease of use, Keepit ensures that DocuSign data and settings are securely backed up and can be recovered swiftly in case of accidental loss or malicious attacks. Keepit effectively minimizes the impact of data loss and the burden of recovery on your teams.

Time-saving usability

Easy to implement and intuitive, Keepit requires minimal expertise to use — while delivering confidence in your ability to swiftly recover your files and configurations whenever you need them.

Easily identify and preview records

Quickly identify the correct data or settings to recover with smart search and previewer for data, metadata, files, and attachments.

Assured data integrity

With Keepit, you're certain that your backups are immutable — they can't be modified or deleted. Stored in our vendor-independent cloud, your data remains accessible at all times.

THE RISK

DocuSign users face meaningful risk if not using external backup and robust security practices, and past breaches show how even partial data exposure can lead to cascading security and reputational consequences.

PROVEN BENEFIT

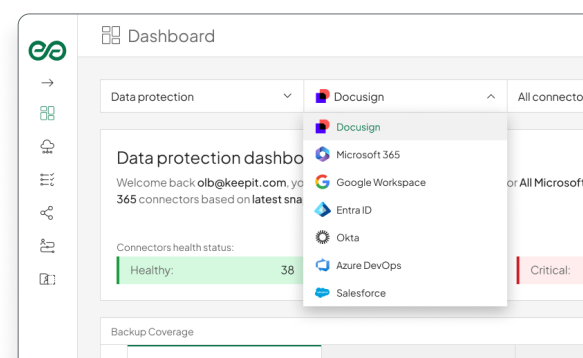

Keepit customers were able to realize a 163% return on investment when deploying the Keepit solution. Payback was achieved in under 6 months.
