

Keepit Backup and Recovery for Okta

Identities and access securely backed up and recoverable — on a sovereign platform

Although it's known Okta is critical for identity and access management, it's not as widely known, that under the shared responsibility model, you are responsible for the security and integrity of data stored within Okta. That's why implementing independent backup is a core component in ensuring business continuity, security, compliance, and resilience.

Awarded for its ease of use, Keepit ensures that data stored in Okta is securely backed up and can be recovered swiftly and accurately when incidents occur. It effectively minimizes the impact of data loss and the burden of recovery on your teams.

Time-saving usability

Easy to implement and intuitive, Keepit requires minimal expertise to use — while delivering confidence in your ability to swiftly recover your data whenever you need it.

Assured data integrity

With Keepit, you're certain that your backups are immutable — they can't be modified or deleted. Stored in our vendor-independent cloud, your data remains accessible at all times.

Unified visibility

A unified platform for all backups across critical SaaS applications — provides transparency, visibility, and easy reporting for managers and leadership.

The risk

80% of breaches involve compromised credentials or weak identity management.

Financial impact

Misconfigured IAM policies can cost organizations up to \$1.5 million annually — from fines, unauthorized access, and productivity loss.

KEY CAPABILITIES

Automated backups

Customize and automate backup jobs so your data remains preserved and recoverable whenever you need it.

Instant search and preview

Easily find what you need with Keepit's comprehensive search. Use filters to identify data, and the preview function to review it before restoring.

Flexible restore options

Restore objects in bulk or granularly to guarantee fast and precise recovery.

Proactive monitoring

Data Protection and Anomaly Detection Dashboards help maintain backup integrity and health —allowing for early identification, investigation, and remediation of risks to data.

Compliance and reporting

Easily document and prove compliance with backup requirements and data protection efforts.

Unlimited retention

Customize retention for up to 99 years with no extra costs.

WHAT WE COVER

Platform management

- Organization
- Administration
- General

Security and governance

- Security
- Policies
- Network Zones
