

Keepit Backup and Recovery for BambooHR

Taking care of your people and your business means keeping your HR data safe

BambooHR is mission-critical for companies, storing sensitive human resources data. It's often integrated with other applications such as productivity or payroll tools. Any data or configuration loss — accidental or malicious — disrupts business operations and exposes companies to legal and compliance risks. BambooHR doesn't offer backups or comprehensive recovery options, making it essential to integrate with a backup solution.

Awarded for its impenetrable architecture and ease-of-use, Keepit ensures that your data is backed up and swiftly recoverable at all times, minimizing the impact of data loss and the burden of recovery on your teams.

Time-saving usability

Easy to implement and intuitive, Keepit requires minimal expertise to use — while delivering confidence in your ability to swiftly recover your data whenever you need it.

Assured data integrity

With Keepit, you're certain that your backups are immutable — they can't be modified or deleted. Stored in our vendor-independent cloud, your data remains accessible at all times.

Confidence in recovery

Have your data always at your fingertips with comprehensive, automated backups of your data and metadata.

THE RISK

In 2024, over 70% of data loss incidents were caused by user mistakes.

PROVEN BENEFIT

Keepit customers were able to reduce the time needed to restore data for priority users by 90% after a data loss incident.

KEY CAPABILITIES

Automated backups

Customize and automate backups so your data remains preserved and recoverable whenever you need it.

Instant search and preview

Easily find what you need with Keepit's comprehensive search. Use filters to identify data, and the preview function to review it before restoring.

Outstanding ease-of-use

Built to protect SaaS applications, Keepit is quick to implement and intuitive to use.

Compliance and reporting

Easily document and prove compliance with backup requirements and data protection efforts.

Highest security

Stored in our vendor-independent cloud, and immutable by design, Keepit offers industry-leading security, keeping your backups safe.

Point-in-time recovery

Restore data to an exact state from any historical point to reverse accidental changes or corruption.
