

Backup and recovery for Microsoft Power Platform

Secure what your teams built with Power Platform and recover it when it matters.

Your teams have invested significant time building low-code apps, automations, and reports in Microsoft Power Platform. Under the [shared responsibility model](#), protecting that data and those workflows ultimately falls on you while Microsoft's native Power Platform backups are limited, offering only short-term retention and full environment restores instead of granular recovery.

With Keepit, you can safeguard your Power Platform environment with automated, secure backups and fast, point-in-time recovery. So even if accidental deletions or malicious activity occur, your business-critical workflows stay intact — and your teams stay productive.

Time-saving usability

Keepit makes it easy for anyone, from citizen developers to admins, to recover Power Platform data quickly — no technical skills needed.

Confidence in recovery

Recover exactly what's missing, without restoring the entire environment. Also, with always-hot storage, recovery is immediate when it matters most.

Business continuity

With Keepit, critical workflows, apps, and reports stay protected and recoverable, keeping your teams productive and your business moving forward even after disruptions.

THE RISK

Users often delete records or transactions [...] via system processes, single selection, multiple selections, and bulk deletion.

PROVEN BENEFIT

Keepit customers realized a 163% return on investment over a three-year period.

“I don't think that you will find a better solution than Keepit when it comes to securing your SaaS data across multiple applications and ensuring robust, independent data security.”

Leonard Haraslin – Information and Cyber Security Specialist,
Penta Hospitals

Keep your work safe and recover the intelligent way.

KEY CAPABILITIES

Automated backups

Set up the connection with Power Platform products and let Keepit run automated backups.

Instant search and preview

Power Platform environments often have multiple apps and complex data. It's easy to find and recover what you've lost with Keepit's search and preview function.

Point-in-time recovery

Restore data to an exact state from any historical point to reverse accidental deletions or app corruption.

Highest security

Keepit's vendor-independent cloud and immutable-by-design architecture ensure your backups stay protected.

Outstanding ease-of-use

Keepit protects your SaaS applications' data, including many other Microsoft applications, while remaining quick to implement and intuitive to use.

Compliance and reporting

Easily document and prove compliance with backup requirements and data protection efforts.

WHAT WE COVER

Power Apps

- Canvas apps
- Model-driven apps

Power Automate

- Desktop flows
- Cloud flows

Power Pages

- Power Pages

Power BI

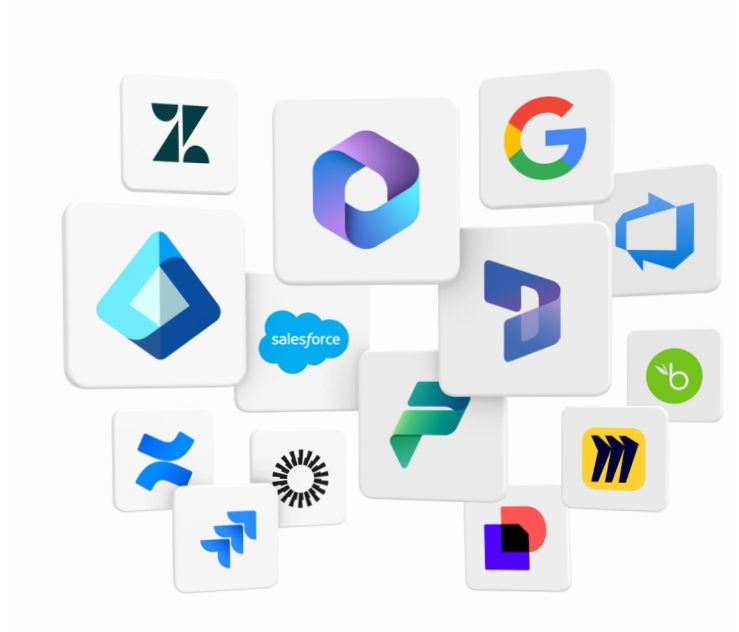

- Dataflows
- Reports
